ABSTRACT

Ethno-botanical study deals with the documentation of the indigenous, time immemorial, traditional knowledge of plants used by the ethnic people. In the present Ethno botanical study (2016-2018) collected the data by conversation, structured questionnaire from various, traditional, tribal, koya, guthikoya, chenchu, kondareddlu, Lambadi and other indigenous group of people in Pasra, Thadvai, Eturnagaram, Mangapeta, Gudur, Narsampet, Pakhal, Bhupalapally and Mahabubabad mandal tribal areas in Warangal district of Telangana. The majority of data was collected from herbal practitioners, traditional healers, tribes and journals. The present study provided information about medicinal plants which are predominantly using in remedies by local peoples. The tribal people, herbal practitioners, traditional healers and rural peoples are helped to identify and collect medicinal plants data which are using in medicine. Present study having a scope for screening of presently recorded plants for active compounds having specific effects on various diseases.

KEYWORDS: Documentation, Ethanobotany, Herbal, Indigenous, Medicine, Tribes, Traditional, Warangal.

INTRODUCTION

The utilization of medicinal plants is known since times immemorial. The utility of medicinal plants played important role in Ayurveda, Unani, Siddha and also in modern medicine. The World Health Organization (WHO) estimated that 80% of the population of developing countries rely on traditional medicines, mostly plant based drugs, for their primary healthcare needs and security especially in Asia and African Countries (UNESCO). Even in modern pharmacopoeia still contains at least 25% drugs derived from plants and many others which are synthetic analogues built on prototype compounds isolated from plants. India and other countries have rich floristic yielding herbal drugs. The world market includes herbal drugs, pharmaceuticals, fragrances, flavors, dyes and other ingredients and their marketing exceeds several billion dollars per year.

The collection of ethnobotanical knowledge is the main source for the discovery of drugs. Field study in a tribal area gives first hand information. the first step in ethnobotanical field work is to identify the local inhabitants or primitive societies and their regional jurisdiction. Ethanobotanist apart from collection of plant, also need to discuss and records the uses of plants with the help of informants (Jain, S.K. 1964). The

primitive communities, who hold the traditional knowledge and practice the traditional way of treatment to cure ailments are the custodians of it, such knowledge of tribal's has only oral traditions without any written documents. This knowledge was even passed through generation to generation and play an important role in conservation and sustainable use of biodiversity. Unfortunately, Due to the changing life style of tribals and fast urbanization, globalization, modernization, availability of hospitals in remote areas the ethnobotanical knowledge on useful plants acquired and accumulated through generations is gradually getting lost. Hence there is an urgent need of recording all ethnobotanical information before they are lost and continuous efforts should be made to collect the information which will provide avenue for future generation.

STUDY AREA

The Warangal district is a part of northern Telangana. It lies between $17^{\circ}19'$ and $18^{\circ}36'$ N latitude and $78^{\circ}49'$ and $80^{\circ}43'$ E longitude. It surrounded with Khammam, Karimnagar, Nalgonda districts and Chhattisgarh and Maharashtra states. The forest cover occupies an area of 3, 71,314 hectares which bear 28.89% of the total geographical area of the district (gov.in map 2017). Warangal district is rich in area under forest cover, plant

diversity and the ethnic people also have more in reserve

as traditional botanical knowledge (Pullaiah, T. 2015).

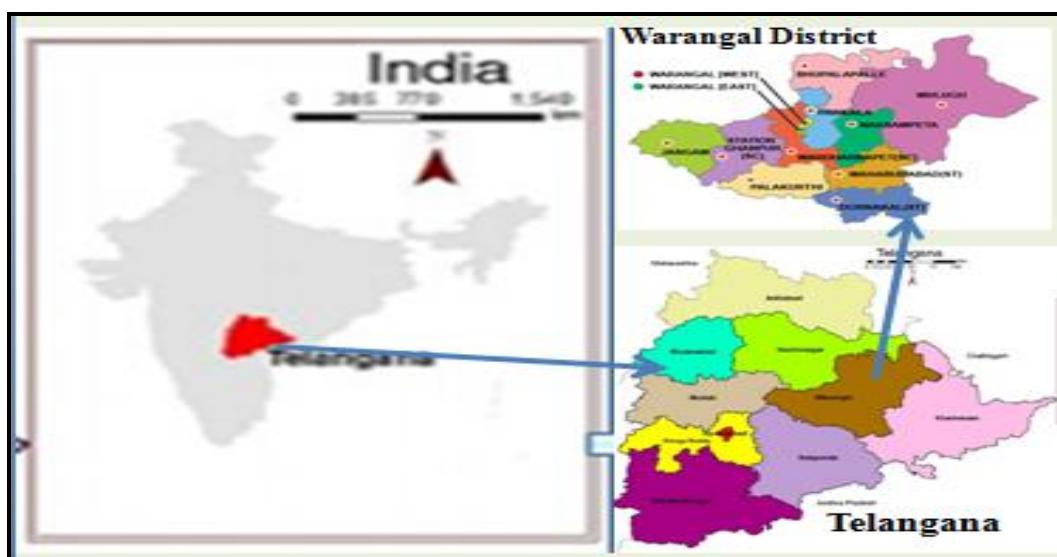

Figure-1: Study Area Map.

MATERIAL AND METHODS

In the present study as a part of Ethanobotanical study Field trips were conducted and ethnomedicinal data were collected during the 2016-2018 through conversation, structured questionnaire from various, traditional healers, herbalists, tribal, koya, guthikoya, chenchu, kondareddlu, Lambadi, other indigenous group of people and elder people in the field trips of Pasra, Thadvai, Eturnagaram, Mangapeta, Pakhal, Gudur, Narsampet, Pakhal, Bhupalapally and Mahabubabad mandal tribal areas in Warangal district of Telangana. Earlier literature studies on Ethanobotanical studies methodologies also observed are Manoharachary and Nagaraju 2016, Manoharachary

et al. 2017, Narender and Mustafa 2016, Reddy *et al.* 2007 & 2016, Suthari *et al* 2014, Sreeramulu *et al.* 2016). During the conversation local names, useful plant parts, method of preparation and dosage were recorded (Hemadri *et al* 1986). In the present study 240 plant species belonging to 72 families and their usages by local tribes are reported. They are using as ethnomedicines for various severe diseases. The tribal people, herbal practitioners, traditional healers and elder peoples are helped to identify and collect medicinal plants data which are using as medicine by local people in the study area (Fig. 2).

Figure-2: Field Visit to Ethno-botanical Study in the Study Area.

RESULTS

Ethno botanical survey was conducted during 2016-2018, with the regular field visits by once in two weeks as a field visit in Warangal district of Telangana. The Ethanobotanical information was collected from local

tribes, elders, herbal practitioners and traditional healers. The present study was carried out to document the traditional knowledge of local people on medicinal plants, and to investigate the distribution, abundance, diversity and biological activity of medicinal plants. We collected ethnomedicinal data through conversation,

structured questionnaire administered with local tribes, traditional healers, herbalists and elder people in the field visits through this beautiful green flourish forest area of Warangal District. During the study local names, useful plant parts, method of preparation and dosage of 250 plant species belonging to 72 families and their active parts of plants (root, leaves, stem, bark, oil, flowers,

fruits, seed, corm tuber latex and gum) used for various remedies, ailments, curing various types of diseases like diabetes, skin diseases, wound healing, sound-clearing agent, toothache, fever, stomach problems, eye infections and abortion. Some are used to treat dangerous diseases like gonorrhea, syphilis, tuberculosis, cancer etc. are recorded (Table-1).

Table-1: List of Medicinal Plants which are using by Local tribes of Warangal District, Telangana State.

S.No	Botanical Names	Local Names	Family	Part(s) used	Usages by Tribes in various remedies
1.	<i>Abrus precatorius</i> L.	Gurija	Fabaceae	Seed	Abortifacient, Insect bite
2.	<i>Abutilon indicum</i> (L.) Sweet	Mudra benda	Malvaceae	Root	Aphrodisiac, Infertility
3.	<i>Acacia chundra</i> (Rottler) Willd.	Sandra	Fabaceae	Bark	Appetite stimulant, Ulcer
4.	<i>Acacia leucophloea</i> (Roxb.) Willd.	Tella tumma	Fabaceae	Stem bark	Wounds
5.	<i>Acacia nilotica</i> (L.) Willd. ex Del.	Nalla tumma	Fabaceae	Bark	Burns, Wound healing, and scalds
6.	<i>Acalypha indica</i> L.	Penta puti	Euphorbiaceae	Whole Plant	Skin disease
7.	<i>Achyranthes aspera</i> L.	Uttareni	Amaranthaceae	Root	Scorpion bite
8.	<i>Acorus calamus</i>	calmus	Araceae	Dried rhizomes.	Drypiles, eczema, scabies, acidity
9.	<i>Adenanthera pavonina</i> L.	Bandi guriginja	Fabaceae	Leaf	Dysentery, hemorrhage
10.	<i>Aegle marmelos</i> (L.) Corrêa	Maredu	Rutaceae	Leaf /Fruit	Skin disease, digestive, constipation
11.	<i>Aerva lanata</i> (L.) Juss.	Pindi kura	Amaranthaceae	Leaf	Wounds
12.	<i>Aerva sanguinolenta</i> (L.) Blume	Konda pindi	Amaranthaceae	Whole Plant	Urinary troubles
13.	<i>Ageratum conyzoides</i>	Meka kalupu	Asteraceae	Leaf	Antioxidant
14.	<i>Ailanthus excelsa</i> Roxb.	Peda manu	Simaroubaceae	Bark	Piles
15.	<i>Alangium salviifolium</i> (L.f.) Wangerin.	Ooduga	Cornaceae	Bark	Snake bite, Bone fracture
16.	<i>Albizia odoratissima</i> (L.f.) Benth.	Chinduga	Fabaceae	Bark	Leucoderma
17.	<i>Allium cepa</i> Linn.	Garlic	Liliaceae	Bulb, whole plant	Antioxidant, anti hypertensive, anti thromboic
18.	<i>Alternanthera sessilis</i> Linn	Ponnagantikura	Amaranthaceae	Whole Plant	Eye, cuts & Wounds, Antidote for snake bite
19.	<i>Amaranthus spinosus</i> L.	Mulla thotakura	Amaranthaceae	Leaf	Appetite stimulant
20.	<i>Andrographis paniculata</i> (Burm.f.) Wall. ex Nees	Nelavemu	Acanthaceae	Whole Plant	Dyspepsia
21.	<i>Anisomeles malabarica</i> (L.) R.Br.ex Sims	Dayyam chettu	Lamiaceae	Whole Plant	Fever
22.	<i>Anodendron paniculatum</i> A.DC.	Athukuduteega	Apocynaceae	Bark	Bone fracture
23.	<i>Anogeissus acuminata</i> (Roxb. ex DC.)Wall. ex Guillem. & Perr.	Pasi	Combretaceae	Leaf	Cough
24.	<i>Annona squamosa</i> L.	Seethaphalam	Annonaceae	Seed	Insect bite, lice in hair, tooth-ache
25.	<i>Argemone mexicana</i> L.	Mulu puccha	Papavaraceae	Whole Plant	Skin disease
26.	<i>Aristolochia indica</i> L.	Nalleswari	Aristolochiaceae	Root	Snake bite
27.	<i>Arva lanata</i> (L) Juss.	Pindikura	Amaranthaceae	Whole Plant	Break Kidney stones
28.	<i>Asparagus gonoclados</i> Baker	Guddelugu bochu	Asparagaceae	Tuber	Aphrodisiac
29.	<i>Asparagus racemosus</i> Willd.	Pilli teegalu	Asparagaceae	Tuber	Aphrodisiac
30.	<i>Atalantia monophylla</i> DC.	Adavi nimma	Rutaceae	Root	Paralysis

31.	<i>Azadirachta indica</i> A.Juss.	Vepa	Meliaceae	Bark	Stomach-ache
32.	<i>Bambusa bambos</i> (L.) Voss	Kanka bongu	Poaceae	Seed	Food
33.	<i>Barleria cristata</i> L.	Neeli gorinta	Acanthaceae	Root	Abortifacient
34.	<i>Barleria montana</i> Nees	Nilambaram	Acanthaceae	Root	Skin disease
35.	<i>Barleria prioritis</i> L.	Mulla gorinta	Acanthaceae	Root	Scorpion bite
36.	<i>Barringtonia acutangula</i> (L.) Gaertn.	Nir kanki	Lecythidaceae	Bark	Veterinary
37.	<i>Bauhinia malabarica</i> Roxb.	Puli are	Fabaceae	Bark	Dyspepsia
38.	<i>Biophytum sensitivum</i> (Linn) D.C.	mukkuti	Oxalidaceae	Leaf Juice	Urinary stone, bilious fevers, snake bite, gonorrhea
39.	<i>Bauhinia racemosa</i> Lam.	Are	Fabaceae	Bark	Leucoderma
40.	<i>Bauhinia semla</i> Wunderlin	Goddeti are	Fabaceae	Bark	Tonic
41.	<i>Blumea bifoliata</i> (L.) DC.	Kukka pogaku	Asteraceae	Root	Cough
42.	<i>Blumea virens</i> DC.	Adavi pogaku	Asteraceae	Leaf	Skin disease
43.	<i>Boerhavia diffusa</i> L.	Atika mamidi	Nyctaginaceae	Root and Whole Plant	Fever, tonic
44.	<i>Bombax ceiba</i> L.	Buruga	Bombacaceae	Bark	Cough, Bronchitis
45.	<i>Boswellia serrata</i> Roxb. ex Colebr.	Anduga	Burseraceae	Bark	Fever, tonic
46.	<i>Breynia retusa</i> (Dennst.) Alston	Purugudu	Phyllanthaceae	Root	Aphrodisiac
47.	<i>Bridelia montana</i> (Roxb.) Willd.	Panchotkam	Phyllanthaceae	Bark	Veterinary
48.	<i>Bridelia retusa</i> (L.) A.Juss.	Korra maddi	Phyllanthaceae	Bark	Veterinary
49.	<i>Buchanania axillaris</i> (Desr.) Ramamoorthy	Pedda morli	Anacardiaceae	Bark and Gum	Skin disease, back pain
50.	<i>Buchanania cochinchinensis</i> (Lour.) M.R.Almeida	Morri, Morli	Anacardiaceae	Gum	Back pain, laxative
51.	<i>Butea superba</i> Roxb.	Teega moduga	Fabaceae	Bark	Urinary troubles
52.	<i>Calotropis gigantea</i> (L.) Dryand.	Jilledu	Apocynaceae	Root	Snake bite
53.	<i>Canavalia cathartica</i> Thouars	Adavi tamba	Fabaceae	Seed	Scorpion bite
54.	<i>Capparis sepiaria</i> L.	Uppi	Capparaceae	Bark	Veterinary
55.	<i>Capparis zeylanica</i> L.	Aadonda	Capparaceae	Root , fruit	Dyspepsia, tonic
56.	<i>Careya arborea</i> Roxb.	Budadharmi	Lecythidaceae	Fruit, Bark	Cough, appetite stimulant
57.	<i>Casearia nigrescens</i> Tue.	Kanmeswaram	Salicaceae	Bark	Fish poison
58.	<i>Cassia fistula</i> L.	Rela	Fabaceae	Fruit	Diarrhea, diuretic
59.	<i>Cassine glauca</i> (Rottb.) Kuntze	Bhutankush	Celastraceae	Bark	Dyspepsia
60.	<i>Catunaregam spinosa</i> (Thunb.) Tirveng.	Manga	Rubiaceae	Fruit	Laxative
61.	<i>Celosia argentea</i> L.	Gunugu	Amaranthaceae	Leaf	Cuts
62.	<i>Ceriscoides turgida</i> (Roxb.) Tirveng.	Kukka elka	Rubiaceae	Bark	Cough
63.	<i>Chloroxylon swietenia</i> DC.	Bilugu	Rutaceae	Bark	Skin disease
64.	<i>Cissampelos pareira</i> L.	Bodhi	Menispermaceae	Root	Cardiac stimulant
65.	<i>Cissus vitiginea</i> L.	Adavi draksha	Vitaceae	Fruit	Healing power
66.	<i>Cleistanthus collinus</i> (Roxb.) Benth. ex Hook.f.	Nalla kodisa	Phyllanthaceae	Whole Plant	Homicide, fish stupifying
67.	<i>Cleome viscosa</i> L.	Vaminta	Cleomaceae	Whole Plant	Skin disease
68.	<i>Chlorophytum borivilianum</i> Sant. And Fernand.	Safed musli	Liliaceae	Roots.	Aphrodisiac, piles, galactagogue, analgesic
69.	<i>Cocculus hirsutus</i> (L.) W.Theob.	Shibbi teega	Menispermaceae	Root	Veterinary
70.	<i>Coldenia procumbens</i> L.	Chepputattaku	Boraginaceae	Whole Plant	Wounds
71.	<i>Combretum albidum</i> G.Don	Yada teega	Combretaceae	Bark	Veterinary
72.	<i>Combretum latifolium</i> Blume	Yada teega	Combretaceae	Bark	Veterinary
73.	<i>Combretum roxburghii</i> Spreng.	Yadaku	Combretaceae	Bark	Veterinary

74.	<i>Cordia dichotoma</i> G.Forst.	Iriki	Boraginaceae	Fruit	Dyspepsia
75.	<i>Cordia macleodii</i> Hook.f. & Thomson	Botuku	Boraginaceae	Bark	Veterinary
76.	<i>Crotalaria albida</i> B.Heyne ex Roth	Adavi janumu	Fabaceae	Root	Scorpion bite
77.	<i>Crotalaria ramosissima</i> Roxb.	Tella janumu	Fabaceae	Leaf	Wounds
78.	<i>Crotalaria verrucosa</i> L.	Tella janumu	Fabaceae	Root	Snake bite
79.	<i>Curculigo orchoides</i> Gaertn.	Nela thadi	Hypoxidaceae	Tuber	Aphrodisiac
80.	<i>Curcuma pseudomontana</i> J.Graham	Adavi pasupu	Zingiberaceae	Tuber	Antiseptic
81.	<i>Cymbopogon flexuosus</i> (Neesex Steud.) W.Watson	Adavi nimma gaddi	Poaceae	Root, tuber	Tonic
82.	<i>Cyperus rotundus</i> L.	Thunga	Cyperaceae	Tuber, Root	Tonic, scorpion bite
83.	<i>Cyptolepis dubia</i> (Burm.f.) M.R.Almeida	Budda pala	Apocynaceae	Root	Veterinary
84.	<i>Dalbergia lanceolaria</i> subsp. <i>paniculata</i> (Roxb.) Thoth.	Porla pachari	Fabaceae	Bark	Baldness
85.	<i>Dalbergia volubilis</i> Roxb.	Teega pachari	Fabaceae	Bark	Skin disease
86.	<i>Dendrophthoe falcata</i> (L.f.) Ettingsh.	Vadanica	Loranthaceae	Whole Plant	Fever
87.	<i>Derris scandens</i> (Roxb.) Benth.	Chakali teega	Fabaceae	Bark	Veterinary
88.	<i>Desmodium gangeticum</i> (L.) DC.	Konda saru	Fabaceae	Root	Scorpion bite
89.	<i>Desmodium triflorum</i> (L.) DC.	Munta mandu	Fabaceae	Root	Hemorrhage
90.	<i>Desmodium velutinum</i> (Willd.) DC.	Teega velga	Fabaceae	Root	Scorpion bite
91.	<i>Dichrostachys cinerea</i> (L.) Wight& Arn.	Veluthuru	Fabaceae	Bark	Skin disease
92.	<i>Dillenia pentagyna</i> Roxb.	Kalinga	Dilleniaceae	Bark, Fruit	Tonic, fever, veterinary

DISCUSSION AND CONCLUSION

The present paper deals with the tribes, elder people, their status of health and medicinal plants used for human health care by the ethnic tribes, traditional healers, elder people inhabiting Warangal District, Telangana State, India.

It is evident that the local tribal people have tremendous passion for medicinal plants, local tribal people still dependent of forest. They have a very rich knowledge on plant based resources utilization for their survival, and use of them for wide range of health related applications from a common cold to memory improvement and treatment of poisonous snake bites to a cure for muscular dystrophy and the enhancement of body's general immunity. In some cases the whole plant has been found useful while in others the plant parts (root, leaves, stem, bark, oil, flowers, fruits, corm and seed) seems to have been used as curative agents. They are using medicinal plants singly in their own preparation for the treatment of various ailments on the basis of indigenous knowledge passed on to them generation after generation on the advice of elders, wise men and religious teachers.

The above traditional knowledge enlightening the scope for screening of presently recorded plants for active parts having specific effects on various diseases. Unfortunately, due to the changing life style of tribals and fast urbanization, globalization, modernization, availability of hospitals in remote areas the ethnobotanical knowledge on useful plants acquired and accumulated through generations is gradually getting lost. Hence there is an urgent need of recording and documentation of all ethnobotanical information before they are lost and also continuous efforts should be made to collect the information from various ethic peoples which will provide wealth for future generation.

ACKNOWLEDGEMENT

The author is thankful to the ethnic, traditional tribal resource persons who shared their Ethano-botanical knowledge in the study area, B.Sc students involved in this study project and also thankful to Commissioner of Collegiate Education, Hyderabad, Telangana for encouragement.
