ABSTRACT

Introduction: All in Earth magnetic field (EMF) gets magnetic properties (MP). Diamagnetic can become paramagnetic. **Aim:** Prove that living world is made of electric beings. Point to generator of electric potential in body. Point to enormous pathological power of anomalous magnetic fields (AMF). Present how does old organism function and how a young one, related to immune system and old age. **Methodology:** Published scientific works in international journals are methodological leaders of this brief information. Mentioned are physiological functions on people in medicine. **Results:** Physiology unclear things are cleared, cells division, breathing etc. Also presented is pathology causing enormous mortality and sicknesses. Cause are AMF. Viruses entrance into a host cell is explained. **Conclusion:** People are magnetic and electromagnetic beings. All chemicals are electric impulses products. Life has appeared according to a magnetic code enabled by EMF and the end of all the living beings will be when EMF disappears, as it had happened on Mars. Biologic-medical science should take into consideration physical fields in order to continue life on the planet Earth.

KEYWORDS: EMF, electric beings, old age and young age, AMF, Corona virus.

INTRODUCTION

Respected Authorities, it is a high time that biology-medical science tries to understand that in bioworld rule magnetic and electromagnetic forces and that they must include Earth magnetic field (EMF), because "Remember well: all that is in EMF gets magnetized (susceptibility increases) and that diamagnetic properties are relative and not absolute, what means that they can be paramagnetics, too, if basic environment is changed. Then, you should understand two more things (as one American professor said): 1. Probably, you think that we are only physical matter. No, we are electrical beings, and chemicals are only nusproduct of these electrical impulses. 2. Central nervous system (CNS) is a generator of electrical potential (EP), which by magnetic properties (MP) performs everything in organism. With a note, that EP occurs by cosmic radiation (soft component) by acting, mainly, upon oxygen (O₂), because there is ten times more of it in CNS, compared to other organs. In brain cortex 40 times more than in other body organs.

Brief Information from Pathology. At the end there is literature that should be studied and understood, and not to follow own knowledge obtained through classical knowledge from schools. It is necessary to study the published works in international scientific journals and to understand, as for example, 1. Division of mother cell into two baby cells is enabled by EMF. 2. Breathing is

enabled, only, by magnetic properties (MP) of the breathers, and not diffusion and partial gasses pressure, as stated by biology-medical science. 3. Immune system functioning is performed due to leucocyte MP and intruders (viruses, bacteria, fungi), and autoimmune diseases appearance is enabled by artificially increased EMF, called anomalous magnetic fields (AMF). 4. Every kind of tumor appearance is caused, only, by AMF from external environment and variable magnetic field, also, from external environment. 5. Cardio-vascular diseases (CVD) appearance is enabled, only, by AMF. 6. Diabetes appearance is, also, caused by AMF. 7. CNS functioning is enabled by cosmic radiation, and mental diseases appearance is the product of electro-magnetic fields from external environment.

Brief Information about MP in Physiology. When you understand these works it will be clear to you how has, firstly, the life appeared on the planet Earth, and how will it end. Then, how do the gravest diseases occur and, then, it will be clear how does Corona virus function and how it will be easier to fight against it. It will be clear how and why aging occurs and why older people more easily get, almost, all diseases.

All that will be presented in this work has been published in international scientific journal in the world. These

works are, I repeat, presented in literature at the end of this work and can be obtained from their author.

How does the Aging Occur and Why. In order to understand why older people get more diseases than younger ones, we must, firstly, understand the proofs that MP rule among molecules and cells, too. Published works pointing to magnetic forces existence among molecules in a cell, are those which explain a mother cell division into two baby cells and breathing. In official literature about cells division it is stated that chromosome chromatides, suddenly, start to move in opposite directions, and it represents a cell's division starting. In biology it is stated that it is not known why these chromatides move in opposite direction and which energy enables it. (lit.2,6 i 7). Force that makes chromatides to move away from each others is, only, EMF. EMF magnetizes chromatides by the same magnetic kind, because telomeres on both chromatides have the same chemical composition, i.e., same nucleotides (A,G,C), with a note, that with each cell division, because of MP aging, nucleotides peel off (decrease the mass in nucleus). It is known that magnetisation center in a cell is in nucleus, and a bit smaller magnetisation is in organelles. Since MP are additive, each cell has magnetisation which, mainly, depends on nucleus size, and less, on other organelles, too. It is known that nucleus is the largest in neurons of CNS because cytoplasm is thin or it does not exist. With a large number of divisions cells MP get smaller, manifesting in decreased metabolism performed under the influence of magnetic forces, getting weaker with aging. Each cell has maximal number of divisions and, at the end, they die, and it is an organism aging, ending with its death. Here, it should be pointed out that aging follows blood vessels, as for example, arteries getting shorter with time, less elastic and of a less volume, what brings less food and oxygen to cells. This is, also, aging manifestation. The point is that cells MP, with time, get weaker and all functions get weaker, as well as the immune system which functions due to leukocytes and intruders MP (lit.5). The conclusion is clear, with aging an organism is very disturbed in its capability of defence - it weakens and that is why many diseases can overpower it, and most often due to AMF from external environment influence.

CNS functioning is generating with the help of cosmic radiation of electric potential moving through nervous fibers in entire body, and it, also, works for brain functioning. Also presented are mental diseases causes, being variable magnetic fields and AMF from external environment (lit. 1 i 3). Work about AMF from external environment as a cause of tumor and CVD appearance, being the greatest cause of diseases and dying in the world and in our country (lit.2,7,4,8). Work about autoimmune diseases appearance is explained and how does immune system function (lit.5). At the end it is shown how does diabetes occur (lit.9).

This is a brief review of main scientific works which will enable a reader to understand everything and it, also, opens new points of view on how does life function and why diseases occur and how they should be prevented and cured.

The condition of MP with young people should be explained. After being born human being grows, meaning that cells divide, enabled by MP in cells which are strong and metabolism function enables growing and immune system functions perfectly, what is all enabled by MP. When all this is known, it is easy to understand why older people are less resistant to various diseases, while young people are more resistant to them. Official science states that young people get more diseases than before. The cause is because young people are in AMF, and this is absolutely the only reason for it.

It is necessary to supplement this brief presentation with pathology occurred by AMF from external environment. Almost all diseases cause (CVD, tumors, diabetes, mental disturbances, asthma, nephritis) are AMF, what is elaborately explained and documented in the works listed below.

Addition to immune system explanation, i.e. leucocytes generated, as all the blood, in bone marrow, function in body because they are in a magnetic balance with all organism cells (homeostatic mechanism). Since every intruder (virus, bacteria, fungus, even extraneous particle) have their own MP when entering organism, i.e. a host cell, for example, Corona virus, gets connected with its receptors for the host cell which in metabolism has MP and it comes into magnetic connection having their own cells as the virus (with DNA or RNA). Virus is brought by magnetic code into cell and in cytoplasm it replicates having enzymes. The virus with its magnetic code builds new nucleic acids and multiplies due to its MP and AMF from external environment, organism starts to fight it but if there is strong AMF it is not strong enough. Older people have weaker immune system, that is why they can not fight it adequately, their heart can not resist it. Young people, however, with leukocytes magnetic properties can oppose it and they do not get the disease strongly. Not knowing, people do not place their bodies out of AMF, which are causes of all pathological matters. This work asks authorities to remove artificial AMF, so the cure will be successful.

Author is ready to, personally, help to cure any person willing to hear this from biology and medicine, what is a new approach to human health.

CVD and tumors end many lives in the world and all because AMF, and not risk factors being only effect of AMF presence from external environment. Author wants to inform you that he has been invited from all over the world to submit his scientific works and publish them in science journals free of charge. As well as to be other

scientists works reviewer. All these works have been available in Serbia and abroad for 30 years.

This brief information is inspired by Corona virus appearance here and in the world because it is seen that biology-medical knowledge is not known. And the author would be very happy if you do not behave according to inertia law, because of the old learned schools knowledge. Your brains have memorized all with 100 mV, and new information memorizes with around 3 mV (1 and 3), that is why you should think logically. You can inform people of the world to eliminate AMF from living environment, and then it is easy to cure all the diseases because for all of them the only cause is AMF.

Benevolent Information. Brief information for biology and medicine: you do not have enough knowledge about Earth physical fields influence upon life appearance on Earth and its end on our planet. There are clear proofs that the end of life will be for about 1500 years, based on satellite follow of EMF getting weaker and it will soon be 0, meaning that there are no division of mother cell. Russian scientists have proven that 0 (null) EMF stops cells division. It is known that on Mars there is no magnetic field and no life and this destiny, surely, is waiting our Earth. It is only possible that we get the true knowledge to make magnetic field artificially to continue life here. It is, also, possible to influence old age and to prolong the personal life.
